

To whom it may concern:

I would like to share my view of the pending consideration of implementing changes to lessen Indiana's Telephone Privacy Act...DON'T! Since we signed up on the NO CALL list, our privacy in our home has increased for we are not constantly interrupted with sales calls nor do we receive phone calls for surveys that last for days if one is polite and gives that phone operator a break. We have been very impressed that since signing up, we have only received one telephone call. When I brought up the fact that we are on the NO CALL list, the operator was very indignant, said a few words (Clean but harsh) and then she hung up before I could tell her goodbye. It is very nice to sit down to dinner and not get interrupted. Prior to the NO CALL listings, my husband and I would be amazed at the people that had our Private, non listed telephone number. This made us question why we pay a phone company for a private line when unsolicited calls are made to our Private line. Hmmm. Of Course, the one not able to bother we consumers cries out "You are squashing our Free rights! etc. etc". We, as consumers, say thank the Lord for the Indiana Telephone Privacy Act. It is working! This makes it very important to me and my family because in today's crazy, crazy world of busy-ness, it is nice to come home to our little safe haven and just be a family. So, in finality, please do not alter or accept changes on behalf of my family unless it is to ensure MORE PRIVACY! ;) Thank you for your time.
